501C(3) non-profit organization*

## LET'S BUILD A HOUSE TOGETHER

**Jackson** is an amazing ten year old boy who is full of joy and has an incredible smile. He suffers from a rare metabolic disorder called Pyruvate Carboxylase Deficiency type 2. This mitochondrial disorder causes severe brain and muscle damage. With his disorder, Jackson requires care 24 hours per day, transportation with a wheelchair, and feeding through a G-Tube. It also necessitates a very complicated and complex regimen of medications and a highly specialized metabolic diet.

It is critical for Jackson that he has a home that is conducive for his unique needs in order for him to experience the best life possible. Samantha's House will be helping Jackson and Amy to obtain a home that is fully-accessible including special features such as a track and carry system that can lift and transport Jackson from his bed to the bathroom; a full roll-in shower; and hospital grade HVAC system.

## HELP BY ATTENDING OR SPONSORING THE 3<sup>RD</sup> ANNUAL GOLF OUTING

Financing for the project will come from private donations as well as a mortgage held by the family. Samantha's House Foundation is a 501C(3) non-profit organization making contributions tax-deductible.

**A house goes up one brick at a time, one board at a time. And, in this case, one contribution at a time.**

**Can Jackson count on yours?**
